INSIGHT DLP APPLIANCE

## SYMANTEC DLP SIMPLIFIED

### IT'S FAST

- The Infolock INSIGHT DLP Appliance comes preloaded with Symantec Data Loss Prevention (DLP) software
- Our proprietary bootstrap application, IDACT, lets you configure network settings in minutes
- You get “out of the box” data protection from Day One

### IT'S EASY

- There's no need for you to procure and provision servers
- HW, Oracle, and DLP application support is provided by our team of Symantec DLP Master Specialists
- Update network settings, reconfigure detection servers, and add appliances all through our web-based GUI
- We pre-test all upgrades, patches, and fixes for physical/virtual server software and underlying O/S
- Standard, subscription, and managed options available

### IT SAVES YOU MONEY

- There's less for you to buy and license
- Fast and easy setup leads to increased productivity as valuable resources can be devoted to other tasks
- Infolock support includes 1 DLP application upgrade per year
- Our several Infolock INSIGHT DLP Appliance models are scalable to networks of any size or complexity

### IT WORKS

- More than 200 successful deployments...and counting!
- Private & public sector companies of all sizes – both in the US and abroad – use Infolock INSIGHT DLP Appliances to keep their data safe
- Extend your existing DLP environment or implement a new infrastructure
- Perfect solution for refreshing old infrastructure

### THE OPTIMAL WAY TO RUN SYMANTEC DLP

Whether you're extending an existing DLP environment or standing up a new one, Infolock INSIGHT DLP Appliances are the painless way to implement Symantec DLP.

A standardized, purpose-built hardware platform on which to quickly deploy – and easily manage – your security applications is critical when time is short and resources are limited.

Infolock's line of appliance solutions, including our INSIGHT DLP Appliance developed specifically for Symantec's DLP software, provides customizable and scalable deployment environments to help protect your sensitive data from Day One.

The Infolock INSIGHT DLP Appliances are built for any environment. Directors contain the Enforce Management Platform, Oracle database, and your choice of key detection modules.

Sensors extend your DLP infrastructure to include additional detection servers. Infolock INSIGHT DLP Directors and Sensors combine Symantec DLP's unparalleled breadth of coverage with the rapid deployment and ease of use in an appliance-based form factor.

ANY ENVIRONMENT**

## DIRECTOR APPLIANCES

MODEL NUMBER	2200 Director
MODEL NAME	Infolock INSIGHT DLP 2200 Director
SIZING/SCOPE	Sized for Medium/Large DLP Suite customers Accommodates embedded Oracle database, Enforce Management Server, and up to six (6) DLP detection servers

MODEL NUMBER	1200 Director
MODEL NAME	Infolock INSIGHT DLP 1200 Director
SIZING/SCOPE	Sized for Small/Medium DLP Suite Customers Accommodates embedded Oracle database, Enforce Management Server, and up to three (3) DLP detection servers

## SENSOR APPLIANCES

MODEL NUMBER	910 Sensor
MODEL NAME	Infolock INSIGHT DLP 910 Sensor Sized for up to eight (8) DLP detection servers

MODEL NUMBER	610 Sensor
MODEL NAME	Infolock INSIGHT DLP 610 Sensor Sized for up to (3) DLP detection servers

MODEL NUMBER	310 Sensor
MODEL NAME	Infolock INSIGHT DLP 310 Sensor Sized for Network Monitor

MODEL NUMBER	310N Sensor
MODEL NAME	Infolock INSIGHT DLP 310 Sensor w/ Napatech Sized for Network Monitor wih Napatech NT4E high-speed network packet capture card

## GET STARTED

The INSIGHT DLP Appliance provides a pre-packaged, pre-installed and pre-configured Symantec DLP environment for organizations to deploy for fast-turnaround data security protection.

By standardizing on a proven hardware-software platform, the appliance simplifies and streamlines the Symantec DLP installation and configuration process and eliminates the need to procure and stage hardware, license and configure underlying operating systems and hypervisors, and test system interoperability. As a result, deployment times are dramatically reduced – allowing you to focus on building your data security program.

## **INFOLOCK** **MAXIMUM CONTROL DATA GOVERNANCE**

Experts in data governance, Infolock provides consulting and advisory services that help you effectively secure, manage, and optimize your data. Our deep understanding of risk management, combined with technical expertise and business acumen, makes us the ideal partner to help you regain control of your data.
