SUPPORT STATEMENT AND PRODUCT WARRANTY

The Infolock INSIGHT DLP Appliance Director and Sensor series utilize the following: Oracle Linux operating system, Infolock's proprietary IDACT software, KVM virtualization platform, virtualized instance of Oracle Database, and/or the ability to run a virtual Network Monitor server. While Symantec has not certified all of these features, this configuration has been fully certified by Infolock and is covered by the INSIGHT Appliance Agreement. In the event of a Symantec DLP software-related issue, customers with valid Symantec Support Agreements are entitled to receive support services from Symantec — delivered in accordance with Symantec's Enterprise Technical Support Policy and assisted by the Infolock INSIGHT DLP support team as needed.

One (1) year, non-transferrable hardware warranties are included with each Infolock INSIGHT DLP Appliance.

GET STARTED

The INSIGHT DLP Appliance provides a pre-packaged, pre-installed and pre-configured Symantec DLP environment for organizations to deploy for fast-turnaround data security protection.

By standardizing on a proven hardware-software platform, the appliance simplifies and streamlines the Symantec DLP installation and configuration process and eliminates the need to procure and stage hardware, license and configure underlying operating systems and hypervisors, and test system interoperability. As a result, deployment times are dramatically reduced — allowing you to focus on building your data security program.
